

How to View a List of My Patients

You can view a list of your patients using the search function. If you have less than 100 patients you will be able to see them all however over this amount you will need to narrow the search criteria, for example search by pathway type.

Click the Find Patient button.

Choose 'My Patients Only' in the Owner field.

Click Search. If you have more than 100 patients you will need to enter an additional piece of information to narrow the search.
