The Trigger Alert Function

The Trigger Alert function is a way of monitoring any significant deviation in a patients scores and question responses.

First find the Trigger Alert function tab, this will be labelled 'alerts' in the User settings tab at the bottom left side of the screen.

If the system can verify your email address and phone number are real, they will be displayed at the top of the Trigger Alert tab page.

Once you have found the form you would like to track the scores of select the Notification Type you would prefer e.g. Email, Text, or Show on Notification Screen Only.

Form	EQ-5D 5L		
Score	Index		
Comparison Rule	Score is less than	x (0.1000)	
Trigger Message	Concern for EQ-5	D Score	
Notification Type:	Email	✓ Update	Unsubscribe

When deviations appear, clinicians are automatically alerted via the system, which makes it extremely useful for proactive patient management, remote patient monitoring and virtual clinics.

After a Trigger Alert notification has been sprung a red alert symbol will be present at the top left of the patients profile.

The system will notify you on your selected Notification Type with a link to the patient who triggered the alert.

You can view all the Trigger Alert functions that have been triggered on the Dashboard Alert tab.
