Validation Errors

Form Validation Errors are a way to remind clinicians to complete their forms.

After you have filled in your form and clicked save at the bottom right-hand side of the screen, any missed fields on the form will trigger a Validation Error.

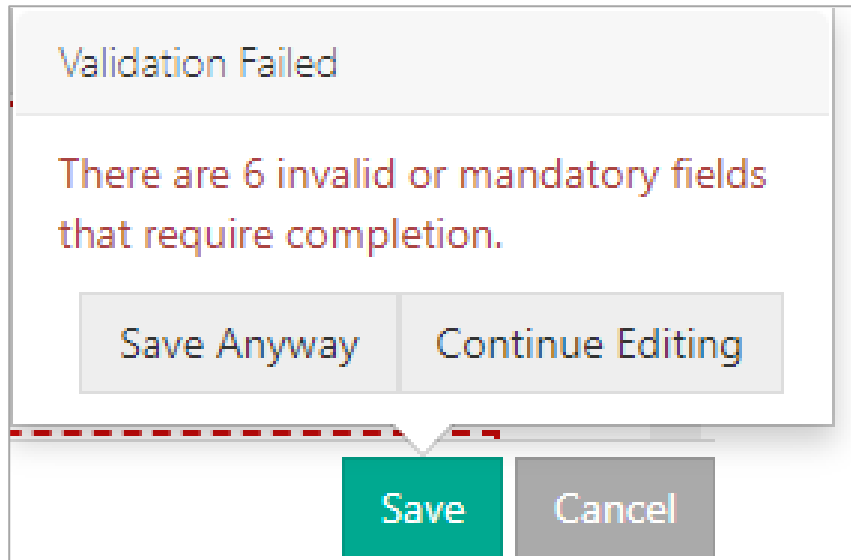

For some systems they will also be shows a Validation Error List on the upper left-hand side, listing all current required fields on the form.

The following validation errors were found

-101:   Required
70736:   Required
66012:   Required
65955:   Required
65961:   Required

A box will pop up above the save button if errors are detected alongside the Validation Errors, showing the number of errors that still remain in the form.

If you want to finish the form at another time, you can click 'Save Anyway' and come back to the form later with all the currently filled in fields saved.

Validation Failed

There are 6 invalid or mandatory fields that require completion.

Save Anyway   Continue Editing

Save   Cancel

Clicking 'Save Anyway' will not mark the form as complete and will stay red on the patient's Clinical Record until completed at another time.

Section 3 - Lifting
*

| I can lift heavy weights without extra pain. | I can lift heavy weights but it gives extra pain. | Pain prevents me from lifting heavy weights off the floor, but I can manage if they are conveniently positioned, e.g on a table. | Pain prevents me from lifting heavy weights but I can manage light to medium weights if they are conveniently positioned. | I can lift only very light weights. | I cannot lift or carry anything at all. |

Select the answer that most clearly describes you today.
